

# Survey Invitation

Dear Colleague,

It has come to the attention of the SCFA that some faculty who have not yet signed the new patent agreement form are being pressured to do so. SCFA members have contacted the board and asked for assistance with particular cases. At least one faculty member risked having substantial grant funds returned to the granting agency, and another is also being told that the form must be signed before any grant monies can be released. We are under the impression that other campuses are not treating non-compliance similarly and we are curious to know how widespread this problem is on our campus, so that we can better assist all of our members.

You have been invited by Council of UC Faculty Associations to take part in this survey.

We value your privacy and assure that all responses are kept confidential and will be used for informational purposes only.

We appreciate your feedback and thank you very much for your time.
